

An Elevator Pitch

Hi, I'm Seif Kungulio. I work in the cardiovascular department at HCA Houston Clear Lake Hospital, where I assist nurses and doctors in providing top-notch care. Alongside this, I'm pursuing a master's degree in data analytics at Maryville University with the goal of transitioning into a data scientist role. My expertise in data collection, manipulation, preprocessing, visualization, and presentation equips me to help stakeholders make data-driven decisions. I'm eager to combine my healthcare experience and data skills to drive meaningful improvements in the healthcare sector.
